- Russian
- Polish (basic)

Educational background

Business Analytics & Data Science (System Analysis)

Lviv Polytechnic National University

- Followed my passion in the core of solving math problems
- Wrote a simple android application with the team for meeting new people

Achievements

The Best Teamwork, EPAM Lviv Social Hackathon, September 2019

- My team created an addition to the Lviv City Council website about upcoming events. In our version - events are adding to the website automatically and can be moderated by the administrator. Also, you can search for events and sort them by particular categories.

The 1st place, All-Institute Hackathon Of Startups From Institute of Computer Science and Information Technology NULP, April 2020

- We came up with the idea of creating web-service for the division of responsibilities for students when he/she will not forget what to do at first.

Work Experience

Software Engineer, March 2020 - present

Vodworks, Lviv, Ukraine

Responsibilities:

- Was developing a website to help Italian business involve money in corona times. The main stack was Next.js, React, styled-components.
- Developing UI software which replaced a default UI for TV-box. The main stack - Coffeescript, HTML, SCSS

Frontend Engineer, Nov 2019 - March 2020

Crystal Logic, Lviv, Ukraine

Responsibilities:

- Was included in a team to develop mobile apps which lets you control your lighting, climate, cameras, and security. The main stack was Angular 5, Ionic and Cordova. My main responsibilities were bug fixing, adding some new features, writing unit tests, app building, updating and publishing it to App Store and Google Play Store.
- Was working with a company web-site, creating new pages.
- Was learning React Native and developing some test apps.
